

AUTO REVERSING TAPPING ATTACHMENT

- Are suitable for use with standard taps on any drilling machine or lathe, vertically or horizontally for right or left hand tapping of blind or thru holes.
- Have adjustable friction-clutch to avoid tap breakage.
- Have self-centring chuck to hold tap true.
- Are extremely useful for mass production.
- Have perfect automatic reversing mechanism with double pull out speed.
- Are made of alloy steel with all moving parts hardened and ground to precision.
- Have all parts interchangeable and easily replaceable.

Batch quantities or Lot production of tapping by this attachment could be achieved accurately on existing machine tool, like a drill, without requiring any modifications. Having versatile application in every machine shop they dispense with laborious hand tapping and threading and use of expensive machines.

Specifications:

Capacity	M2 - M4 1/16" - 3/16"	M3 - M10 1/8" - 3/8"	M6 - M16 1/4" - 5/8"	M8 - M18 5/16" - 3/4"	M10 - M24 3/8" - 1"	M14 - M30 9/16" - 1 1/4"
Shank Morse Taper	1	1 or 2	2 or 3	3	3 or 4	4

Note : Taps do not form part of Tapping Attachment Supply.
